School safety has never been more crucial! The educational experience of many students is hampered by inadequate and unsafe education facilities. Poorly designed and improperly maintained school buildings have demonstrated negative effects on student behavior, achievement, health and sense of security.

Whether planning for new construction or making improvements to existing facilities, the one-hour Safe Schools by Design webinar will provide participants with an overview of important safety and security features to consider for school buildings and grounds. Join us for this important event!

**Federal Resources Available**

**Guides, Manuals, and Studies**

DATE: March 5-7, 2015
LOCATION: Virginia Beach, VA

Visit EFC Staff at booth #424

The Green Schools National Network has created a "culture of collaboration," as a result of year-round networking and partnerships, and through an annual national conference. Colleagues come together to share their passion, offer their own green schools experiences, and put together a truly collaborative event with thought leaders and early adopters of green school best practices. Attendees are passionate about transforming schools and the way they operate.
